PROFESSIONAL SUMMARY

IT professional with 4+ years of experience bridging technical development and business needs. Skilled in coordinating multiple digital projects from client requirement discussions to deployment, managing client relationships, producing technical documentation, and translating business goals into workable IT solutions. Background spans web and mobile application development, system analysis, and hands-on project coordination across multiple concurrent projects in a fast-paced environment.

WORK EXPERIENCE

Programmer & Project Coordinator (Contract)

Benerit • Jakarta, Indonesia Juni 2024 – February 2026

Tech Stack: React, Next.js, Laravel, Flutter

Served dual responsibilities as technical developer and project coordinator — managing client communications, aligning cross-functional teams, and overseeing delivery of multiple concurrent digital projects.

- Led client meetings to gather requirements, present project proposals, and provide progress updates
- Translated business requirements into technical implementation plans and user stories for development teams
- Coordinated up to 4 concurrent projects, tracking milestones and aligning team deadlines
- Proactively identified and resolved project blockers to keep delivery timelines on track
- Helped decide the appropriate tech stack and server architecture for each project
- Researched and evaluated new technologies for system improvement.
- Delivered 5+ client projects from initial scoping through go-live and post-launch support
- Created technical documentation including flowcharts, ERDs, system specs, and user guides for handover
- Managed iOS App Store submissions and coordinated build preparation with the development team
- Provided post-launch system maintenance and support for production environments used by multiple clients

IT Consultant & Freelance Web Developer

Self-employed • Remote 2025 – Present

Acted as an independent IT consultant and web developer — managing full project scope from initial client consultation and requirement analysis to delivery, deployment, and performance reporting.

- Managed project scope, timelines, and budget for each client independently
- Consulted with clients on digital strategy, technology stack selection, and website improvement
- Delivered well-documented, maintainable code and handover materials for each project
- Maintained regular client communication to align expectations and keep projects on track
- Implemented and monitored SEO strategy using Google Analytics, Search Console, and Tag Manager
- Revamped older websites with improved UX, performance, and content structure

Mobile Developer

Elga Network • Jakarta, Indonesia Jun 2023 – Aug 2023

Tech Stack: Flutter, Dart

Contributed to the Benerit B2C mobile platform, collaborating closely with backend and design teams to deliver a seamless customer-to-business transaction experience.

- Maintained consistent collaboration with the backend team during API integration
- Followed project guidelines and Flutter best practices to deliver assigned features on schedule
- Communicated technical constraints and progress updates within the development team

Frontend Developer & UI/UX Designer (Internship)

Elga Network • Jakarta, Indonesia *Des 2022 – Jun 2023*

Tech Stack: *Laravel, Figma, Flutter*

Contributed to both the design and technical implementation of internal HR products, improving user engagement and collaborating across functions to deliver product updates.

- Redesigned Elgaday HR Mobile Apps, increasing customer engagement rate by over 30%
- Collaborated with product and backend teams to align UI implementation with business requirements
- Produced UI/UX wireframes and prototypes to communicate design decisions to stakeholders

Frontend Developer

Litedex Protocol • Jakarta, Indonesia *Des 2021 – Okt 2022*

Tech Stack: *HTML, CSS, JavaScript*

Developed and maintained the company's customer-facing web platforms, contributing to measurable improvements in user engagement and product quality.

- Increased customer engagement rate by over 20% through continuous web development and improvement
- Coordinated with the team to identify and resolve over 15% of reported user-facing bugs
- Ensured cross-platform accessibility by building responsive layouts for desktop and mobile

Frontend Developer & UI Designer (Internship)

Litedex Protocol • Jakarta, Indonesia *Sep 2021 – Des 2021*

Tech Stack: *React, TailwindCSS, Figma*

Completed an internship contributing to frontend development and UI design for client-facing web projects, including an NFT platform.

- Delivered 50+ UI components aligned with client design requirements and project specifications
- Designed wireframes and prototypes that served as reference for development and client sign-off
- Collaborated with senior developers to learn and apply best practices in a real project context

EDUCATION

Bachelor's Degree in Informatics Engineering

Universitas Gunadarma • Depok, Indonesia *Sep 2019 – Aug 2023*

GPA: 3.37 / 4.0

Student – Mathematics & Science

SMA Negeri 66 • Jakarta, Indonesia *2015 – 2018*
